

ABSTRACT

A glass paste comprising an inorganic powder, wherein the powder has a refractive index of 2.0 or more, a reflective index at wavelengths of light of 400 nm, 550 nm and 700 nm in a light reflection spectrum of 80% or more, a primary particle size measured by scanning electron microscopy of from 0.1 μm to 10 μm , and a BET specific surface area of from 0.1 m^2/g to 15 m^2/g .
